The **O**ntario **M**akers and **M**entors **I**nnovation **C**onference organizing committee is made up a group of dedicated students from the University of Ottawa who want to promote project based collaborative learning, innovative design and higher technical education.

Our Initiative

We aim to bridge the gap between makers and mentors by promoting innovation through new technology. The conference will take place from October 27th to October 29th, 2017 in our Nation's Capital. Projected attendance is estimated to be 150 people, with our main demographics to include educators, teachers, young entrepreneurs, and students ranging from elementary to university levels.

Why Sponsor Us?

The **O**ntario **M**akers and **M**entors **I**nnovation **C**onference will be an excellent opportunity for companies and organizations to market to our two main demographics; mentors and makers. Mentors include teachers and educators looking to build Makerspaces and promote technology through education. Makers are students or members of the public who like to build, design and tinker. During the conference, a design competition will be hosted to inspire creativity and innovation in participants.
